

CAR OPENING ACCESSORIES

Air Wedge™

*Ask for HPC's Original Air Wedge™!
Accept no substitutes!*

HPC's Air Wedge™ (AW-99) slides between the vehicle door and the weather stripping on the door frame. Then the pump is squeezed, inflating the Air Wedge™ and separating the vehicle door from the frame. This provides more than ample room to insert a car opening tool, such as CO-6, CO-78, CO-80, CO-81, CO-82 or CO-83. The Air Wedge™ is made of a sturdy vinyl and equipped with a release valve. The Air Wedge™ works exceptionally well with the HPC AutoSleeve™ (AS-1).

Air Wedge™ Features:

- Aid in separating weather stripping from window glass for wedging
- Aid in inserting wedge between door and frame

Technical Data:

- Typical Pressure: 220 lbs.
- Maximum Pressure: 440 lbs.
- Thickness, not inflated: 0.08"/2mm
- Thickness, max. inflated: 2.75"/7cm
- Dimensions: 6.25"/16cm x 5.75"/14.5cm
- Material: Reinforced Vinyl

No. AW-99

AW-99 Air Wedge™ shown here with the AutoSleeve™ (AS-1) and the Switch Stick (CO-80). A great combination of tools for opening many vehicles without damaging the side air bag, risking disconnected linkage, damaging weather stripping, or chipping paint.
