

CAR OPENERS

Universal Air Wedge™

The new Universal Air Wedge™ is four tools in one!
It opens cars, installs doors and windows, holds doors,
and opens garage doors.

No. AW-100

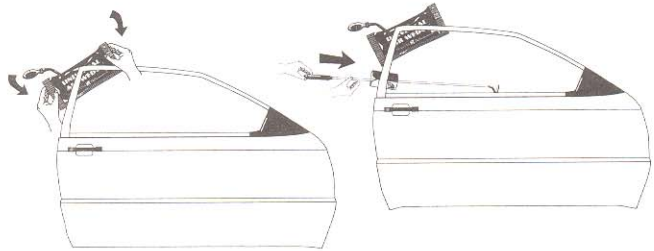

Like the Original Air Wedge™, the Universal Air Wedge™ is made of a sturdy vinyl and equipped with a bulb pump and release valve for quick and easy inflating and deflating.

Technical Data:

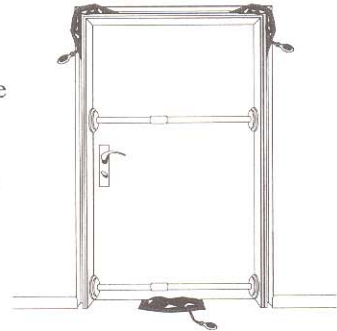

- Thickness, not inflated: 0.08"/2mm
- Thickness, max. inflated: 2.75"/7cm
- Dimensions: 11"/28cm x 5.125"/13cm

Universal Air Wedge™ has four different uses:

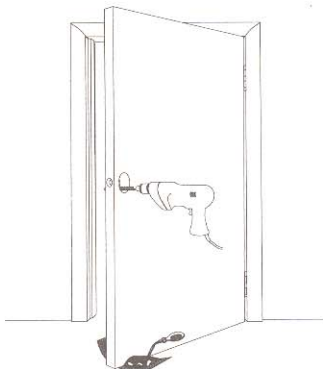

1. Opening Vehicles – When opening vehicles, the Universal Air Wedge™ works just like the original HPC Air Wedge™. It slides in between the vehicle door and doorframe. When inflated it offers ample room for the insertion of a car opening tool, so that the vehicle can be opened safely and quickly from the inside. What makes the Universal Air Wedge™ special is its increased width, giving you a larger gripping area for inserting the wedge into the top corner of tighter fitting doors.

2. Installing Windows & Doors – The Universal Air Wedge™ holds windows and doors in place while leveling for easier installation. Simply slide the Universal Air Wedges™ around window or door and inflate.

3. Holding Doors Open – The Universal Air Wedge™ is an inflatable door stop that holds doors still during lock installation. When the door is open, slide the wedge underneath the door.

4. Opening Garage Doors – Use the Universal Air Wedge™ to quickly and easily open overhead garage doors. Slide the wedges in between the door and the jamb. Inflate the Universal Air Wedges to push the latches out of the locked position; then, just lift the door to open.
